

seating and benches

5 good reasons why you should choose recycled plastic seating from Low Carbon Products

**Extremely
durable, strong
and vandal-proof,
eliminating
maintenance for
lower whole life
costs**

**Ultra low carbon
footprint as made
from recycled
and recyclable
waste diverting
material from
landfill**

**No need for paint
or other harmful
preservatives**

**Does not splinter,
rot, crack or fade
and is totally
impervious to
water, algae, and
insects**

**Can be worked
just like wood**

Whether you require maintenance-free benches for your school playground, are choosing street furniture for an urban development or improving facilities for hospital grounds, a town or village centre or any other specific environment, we have the answers.

Our range of outdoor furniture is vandal-resistant, weatherproof, safe and designed to meet the most demanding application.

Available pre-assembled or flat packed in kit form, in a wide range of colours and styles, all of our benches are manufactured in the UK using recycled and recyclable mixed plastic that would have traditionally ended its life in landfill.

Low Carbon Products benches have an expected life expectancy of at least five times that of timber alternatives, with little or no visible wear. Because they are rot and algae proof, negligible maintenance is required and neither painting nor preservatives need to be applied. Recycled plastic benches will not crack or dry out and are impervious to attack by insects so there are significant cost savings due to negligible maintenance and replacement requirements.

Optional Anchor Kits

Benefits

Kit Type 1

Suitable for all soft surfaces.

- Protect your furniture from thieves and vandals with anchors.
- Quick and easy installation into soft ground.
- Avoid the mess of mixing concrete or time consumed digging holes.
- Anchor driven 500mm below ground.
- Bolt down kits also available for hard ground fixing.
- Suitable for all outdoor furniture.
- Security screws included.

1. CHECK

- Always check for buried services.

2. POSITION

- Mark hole positions through straps, drill 2 pilot holes: 3mm dia X 45mm deep.
- Fix straps using either cross point or vandal-resistant screws.
- Position seat.

3. ANCHORING

- Insert drive bar through sleeve and into anchor. Position anchor through the strap.
- Using a hammer, drive the anchor at a shallow angle from the vertical, until flush with the strap.

4. DRIVING OUT THE FLUKE

- Removing sleeve and using the drive bar only, hammer down to drive out the fluke.

seating and benches

Optional Anchor Kits (contd.)

Fixing Kits:

- 2 types available with one for hard surfaces and one for soft surfaces.
- Soft surface type is suitable for grassed or earthed areas.
- Hard surface type is suitable for paved, slabed, concrete or tarmac areas.
- Soft surface installation instructions are enclosed with the kit and hard surface kit is supplied with a 120mm long thunderbolt with additional M8 coach screws that are 50mm long and area attached to two legs only. Brackets are made from 4mm thick aluminium.
- Any furniture item can make use of these types of fixing kits with the exception of the Metal Framed Seat as these items are already supplied with pre-drilled holes for bolting to hard surfaces only.

Fix Kit 1

Suitable for all soft surfaces.

Fix Kit 2

Suitable for hard surfaces.
